The Compliance Officer's Guide to Managing the Use of AI

Jon Moore, CRO & SVP Consulting Services, Clearwater
Leah Voigt, Chief Compliance Officer, Corewell Health

Today's Mission

Understand the role of the Compliance Officer in an AI enabled healthcare organization and how that role may be fulfilled.

Sense-Making in AI Governance

Guiding organizations through AI's complexity.

Compliance officers are pivotal in sense-making for AI governance, guiding healthcare organizations through the complex interplay of regulations, ethics, and AI technology to ensure safe, transparent, and ethical outcomes.

- **Interpreting Regulations:** Translate complex laws (e.g., HIPAA, EU AI Act) into actionable AI policies.
- **Mitigating Risks:** Identify and address AI biases, errors, and data privacy risks.
- **Ensuring Transparency:** Promote explainable AI to build trust with patients and regulators.
- **Facilitating Collaboration:** Bridge AI developers, clinicians, and leadership for aligned governance.
- **Driving Ethical Use:** Embed ethical principles into AI design and deployment.

How can AI be used in healthcare?

Medical diagnostics

Clinical workflows and provider decision support

Clinical documentation and patient interfaces

Precision medicine

Drug and therapeutics discovery

What are the “big issues” for ethics and compliance?

Bias and
accountability

Informed
consent and
transparency

Quality and
patient safety

Research and
development

Information
privacy and
security

Third-party and
vendor risk
management

How can Compliance Officers address the “big issues”?

01

Engage the right stakeholders

02

Help develop a governance framework

03

Continue to assess

- the legal and regulatory landscape
- your organization’s values, strategy and risk appetite
